

MAYBRAYS

RADIATORS

HEATED TOWEL RAIL BATHROOM ZONES

FOR ELECTRIC & DUAL FUEL

LOCATION OF ELECTRICAL EQUIPMENT IN BATHROOMS:

Bathrooms are divided into zones. Each zone is dependent on its location in regards to areas of water such as baths, showers and sinks. Zones should be adhered to avoid serious injury or death.

ZONE 0:

This is within the bath or shower tray itself. No Maybrays Radiators products should be fitted in this area.

ZONE 1:

This is the area directly above the bath and shower tray to a height of 2.25m. We strongly advise against fitting any products in this area for both your safety and product longevity.

ZONE 2:

The area stretching 60cm from Zone 1 and within a 60cm radius of the top of the sink. Our towel rails can be fitted in this area.

ZONE 3:

The area outside zones 0, 1 and 2. Our full range of heated towel rails can be fitted in this Zone. The above diagram is only a guide. Please refer to I.E.E. Wiring Regulations for detailed information.

Our electric elements are rated IP64
